Rethinking Mental Health Care

Hosted by GIP45 Federation Global Initiative on Psychiatry

3rd Rethinking Mental Health Care Conference

Caring for CARERS

30 September – 2 October 2027

Sofitel Montreal Golden Mile Hotel
Montréal, Canada

www.rethinkingmnh.org

TARGET AUDIENCE

- Health and mental health professionals
- Community-based organizations
- Policymakers
- Government decision-makers
- Researchers
- Persons with lived experience and their family/carers

THEMES

The conference will focus on four interrelated themes driving progress in global mental health care:

1. **(Mental Health Care) Support for Carers**
   Highlighting the vital yet often overlooked role of carers as a cornerstone of effective mental health support.
2. **Veteran Mental Health**
   Focusing on the well-being of veterans, their families, including children, and their communities.
3. **Technological Innovation in Mental Health Care**
   Exploring how emerging technologies are transforming mental health care delivery and expanding access to support.
4. **Human Rights in Mental Health Care**
   Human rights are fundamental to mental health care, including the meaningful involvement of people with lived experience. While progress has been made, important challenges remain in ensuring rights-based approaches in practice.

Together, these themes reflect a shared commitment to strengthening support for carers, veterans, and their families, while using technology to enhance mental health care and extend its reach to underserved populations.
